Raistonia solanacearum
Raistonia solanacearum
Bacteria; Proteobacteria; Betaproteobacteria; Burkholderiales;
Burkholderiaceae; Raistonia.
1 (bases 1 to 719)
Munoz-Soriano, V., Arahal, D.R., Terol, J., Buades, C., Perez-Perez, A., Llop, P., Belmonte, U.C.F., Lopez, M. and Perez-Alonso, M.
Random genome sequencing of Raistonia solanacearum strain IVIA 1602 and comparative analysis with strain GMI1000
                                                                                                                                                                                    AJ863670 739 bp DNA linear GSS 30-NOV-2005 Ralstonia solanacearum GSS, clone V789R, genomic survey sequence. AJ863670

Bacherichia coli

Bacteria: Proteobacteria; Gammaproteobacteria; Enterobacteriales;

Enterobacteriaceae; Escherichia.

1 (bases 1 to 1498)

10, G., Williams,H.D., Gibson,F. and Poole,R.K.

Mutante of Escherichia coli affected in respiration: the cloning

and nucleotide sequence of ubiA, encoding the membrane-bound

bydroxybenzoate:octaprenyltransferase

Submitted (103-SEP-1993) 608-263-7459
Cot 29, 1993 this sequence version replaced gi:396288.
This sequence was determined as part of the E. coli Genome Project (Frederick R. Blattner, director) at the University of Misconsin-Madison. Supported by award HG00301 from the NIH Human Genome Project. The entire sequence was independently determined from E. coli MG1655, overlaps and conflicts with other sequence determinations are annotated. The start of this entry overlaps the end of the entry ECUW87 (119201) by 93 bp. NOTE: An update was submitted on 25-OCT-1993, reflecting a correction to the hemE
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           BCT 17-DEC-1993
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              /gub_etrain="MG1655"

Sequence 25, Application US/09064693A

Patent No. 6210937

GENERAL INFORMATION:

APPLICANT: Ward, Thomas E.

ITILE OF INVENTION: BNGINEBRED BACTERIA FOR PRODUCTION TITLE OF INVENTION: BNGINEBRED BACTERIA FOR PRODUCTION TITLE OF INVENTION: OF A SPECIFIC PLASTICS PRECURSOR NUMBER OF SEQUENCES: 26

CORRESPONDENCE ADDRESS: 36

ADDRESSEE: W. Gary Goodson ADDRESSEE: INVELL-Lockheed Martin Idaho

ADDRESSEE: INVELL-Lockheed Martin Idaho

STREET: P.O. Box 1625

CITY: Idaho Falls

STATE: Idaho Falls

CONNTRY: USA
